W. G. BRADLEY,
MAYOR OF ROCHESTER, N. H., 1898-9, 1902-3, 1907.

Fifteenth Annual Report

OF THE

City of Rochester,

New Hampshire,

FOR THE

Year Ending December 31st,

1906.

PRINTED BY
COURIER PUBLISHING COMPANY,
ROCHESTER, N. H.

INAUGURAL ADDRESS

OF

MAYOR WILLIAM G. BRADLEY.

Gentlemen of the City Council:

I have accepted the office of mayor, as tendered me by the voters of our city, realizing to some extent the responsibilities and obligations which the office imposes upon me, with much personal sacrifice to myself; still, I should be most ungrateful if I did not acknowledge my heartfelt thanks to my fellow citizens for the great honor they have conferred upon me, regardless of party, in electing me to the office of mayor at the city election, under the most adverse circumstances; which shows so plainly the confidence that the citizens placed in me after serving in the capacity of mayor for four previous years, namely: 1898, 1899 and 1902, 1903. I can only say that I feel doubly under obligations to do the very best that is within my power; with this one object in view, at all times, to do only that which seems to be for the best interest to the largest number of our citizens in general. Allow me to say right here, without fear or favor, that I am not pledged to any man or body of men. I shall know no difference, while holding the office of mayor of our city, between one party or the other, as I have no friends to reward or enemies to punish. The only wish of my heart is to give to every citizen and taxpayer the best administration of the affairs of the city that the

circumstances will admit of; for there are circumstances that occur in the management of municipalities that never occur in private life.

The requirements of the public to-day call for and expect a careful consideration of the expenditures of a very large sum of money, aside from the regular appropriations of some eighty odd thousands of dollars for the general running expenses of the several departments of the city. Now the citizens elect eighteen able men at the ballot box as councilmen, who are divided into committees of three each, by the mayor. By reason of his office, the mayor becomes one of the committee in several of the departments, but not all of them. The business of the city is done largely through these committees, who are expected to give careful attention to the details of these several departments; but these eighteen councilmen are composed of men who are busy with their private business, and those who labor daily at their several vocations in life, and can ill afford to give at all times the attention that might be necessary in order to be familiar with all the facts pertaining to this or that department in all of its workings. It is important, therefore, that the mayor should be in touch with, and know something about the workings of all the several departments of the city. But few of our citizens have the remotest idea of the many questions asked, and demands made upon the mayor. The greater part of these are just, and which he would find a hard matter to deal with if he was not fairly well acquainted with the workings of the city affairs.

There is always a great tendency to criticise public officials in their actions. There is a great deal of this criticism which, in my opinion, is not always just or fair, but is caused, I think, in a great measure from the fact that the people who so act as critics do not look into the facts of the several matters pertaining to their city, which are under consideration at the time, from all points of view, and, therefore, do not at all times have as thorough an understanding of the situation in

regard to these matters, as they come up, as those whose duty it is to act upon them. Now all just and fair criticism I believe to be conducive to helping to bring about better results; and I sincerely hope that the tax-payers of our city will be as willing to lend their good advice and assistance to the city council and the mayor as they are to criticise; for, I think, it would have a tendency to encourage your city officials to try and give you the best administration of the affairs of the city that they possibly can. Do not expect too much, for the most of us have some slight knowledge of how hard a matter it is to provide for our own families as we would like to on nine dollars per week, when we ought to have fifteen.

Gentlemen of the city council:—I find we have a very serious problem confronting us: that is, the finances for 1907; for they are in such condition that there must be great care exercised making up the appropriations for the several departments; and it must not end in the matter of making them up, for they will have to be continually watched and guarded to see that each department keeps within its appropriation, and also to see that the best results possible are got from each for the money expended; for our tax-payers rightfully demand a careful expenditure of their money.

They are looking to us for improvements along some lines, and I do not think it necessary at this time for any of us to ask the question along what lines do they mean. Owing to the constantly increasing demands made upon our city, in order to keep abreast with the times, and to supply its necessary wants, and the city being divided into three distinct parts: East Rochester, about two and one-half miles east from Central square; and Gonic, about two miles south, being thinly populated between the two; and with about 150 miles of roads, also some twenty miles of sidewalks, it takes from twenty-five to thirty-five hundred dollars each year to keep them broken out by reason of snow. I know of one storm and blow that cost sixteen hundred dollars to make them fairly passable. It also divides our library, fire and police departments into

three parts, that have to be maintained ; whereas, if these two parts of our city were all centered in the city proper, I think we would get much better results, notwithstanding they are all run and looked after very carefully.

Now as I have said before, in my inaugural several years ago, and I firmly believe now that it is of vital importance to the city to-day as well as to the future, whether the tax rate be two or two-twenty or two-forty per cent. I think every permanent improvement should be bonded, so that this generation will pay a part and our posterity a part. Why should not the future generation assist in paying for the improvements which benefit them as well as us : such as school houses, public library, fire stations, city building, iron bridges, etc. ? I believe in business principles : that what is important should be carefully considered, and what is necessary should be undertaken without delay.

Whatever permanent improvements are essential, I am heartily in favor of, but beyond this we should not go ; for you must look out and not make permanent improvements so fast that the interest on your entire city debt, figured with the regular running expenses of your city, will bring the tax rate up to such a high rate of taxation that it will be a burden to property holders and the business of our city in general ; for if you do, it will be hard to get new business, and but few, if any, will build new buildings to be taxed for. I believe we should be as liberal as possible to all business enterprises, for business is what builds up the city. I do not mean by this to exempt them entirely from taxation.

FINANCES.

I will now lay before you the condition of our finances, and some of the important departments together with such recommendations as seem to me to be entitled to your consideration.

The following is a statement of the financial condition of our city as shown by its books:

Liabilities:

Outstanding water bonds,	\$170,000.00
Outstanding notes,	121,820.72
Outstanding sewer bonds,	65,000.00

Present indebtedness, not including water bonds,	\$186,820.72
--	--------------

ASSETS.

Amount due on collector's list,	\$15,561.72
Boston & Maine R. R. stock,	800.00
Cash in city clerk's hands,	29.01
Cash in treasurer's hands, exclusive of money belonging to water department,	4,231.20
	<u>\$20,621.93</u>

Net debt, exclusive of water bonds,	\$166,198.79
-------------------------------------	--------------

POLICE DEPARTMENT.

There is no department of our city which comes in contact with the every day life of the community, and which is so constantly under the eye of a critical public, as this department of police. Its duties and responsibilities this year will be very trying, for the city voted no-license, and I think the voters meant it and want to see it tried under the new law. I believe they should watch the liquor traffic very closely, and if any should spring up that they will be brought to the court with no let up. The majority demand the enforcement of the law in regard to this to-day. I hope to be able to work in harmony with the city marshal, and, in fact, with every police officer on the force, as I wish to take part with them. I promise them I will not ask them to do this or that or the other that I will not personally take the blame, or, in other words, will stand back of; for, I believe, in no small degree it is mutual between the marshal, his officers, and the mayor, whether there be faithful

and efficient service rendered or not; in fact, I believe this applies to every department.

PUBLIC LIBRARY.

Rochester has many reasons to be proud of its Public Library. This institution, like our public schools, is an educational one, and we now have an elegant building that is a credit to our city, but with it also comes a necessary added expense in order to maintain it. I find on investigation that the appropriation of \$2,000.00 of this last year, and I find there was \$878.63 carried over from 1905, making \$2,878.63 for 1906, was not enough for the proper maintaining of the library, say nothing about the purchasing of new books or getting out of a supplement to the catalogue, which was printed in 1899. These two last named are of vital importance to the library in order to keep it to its high standing, for it will not suffice that we get a nice house to live in, but it is also necessary that we have something for the mind and body to feed and live upon; and, in view of its pressing needs, I feel we should be as liberal in its appropriation as the financial condition of our city will warrant. I think the librarian, Miss Lillian E. Parshley, and her assistants are doing very efficient work, and are trying to keep in touch with all the new systems of library work as far as it seems consistent.

HIGHWAY DEPARTMENT.

This is a most important department for it benefits every inhabitant of our city also our visitors and it carries with it the expenditure of a considerable amount of money. A few years ago there used to be spent in this department \$12,000 to \$15,000 a year, of late years it has been from \$8,000 to \$11,000 and by reason of the continual digging of our streets in all sections of our city to lay main water pipes and to connect some fourteen hundred takers of water, also the deep and surface sewers as they must be dug up to connect the houses in the city with the water and deep sewer, also electric

road, telephone, gas and so forth and we have eighteen bridges to care for and keep planked, which means twenty to twenty-five thousand feet per year, and some two hundred and fifty culverts and a great many of them have to be cared for more or less every year, and with about one hundred and fifty miles of roads and our soil is not of the best for building or repairing them with and there is not hardly a piece of road to-day that does not need some attention, this department will be difficult to handle this year. Owing to its condition it ought to have \$15,000 this year in order to make much of a showing. Still, I am in hopes your committee on highways will be able to accomplish something along this line of smoothing them up some everywhere so as to better their condition. I hope at the end of this year to be able to see some improvement made on them for the amount of money that will be awarded this department. Now as to state work on our highways I am of the same opinion that I was one year ago, that it should start from Central square. If the macadamized road that was built on the old Dover road, it seems to me, if it had been started at the corner of Liberty street and Charles street, the money expended, I think, would have reached close to the gas house, and as that road is in a very bad condition it would not have needed anything done to it this year, for it is the only way to fix that road through to Gonic. I think it would benefit a greater number of our citizens than what it does now, for there is a great deal of teaming and travel between the two parts of the city and must of necessity always be. The same is true of the road between East Rochester and the city proper. While there has been a little done to better its condition, it still needs a great deal more done as a part of it is low and swampy and it was built as cheaply as possible. In some parts of it it keeps settling and breaking through, which goes to show something about the foundation of some parts of this road. While I hope to see some improvement in our roads, our citizens must not expect too much along these lines all at once with the small amount of money we shall have to do with.

HEALTH DEPARTMENT.

I think this department is doing most efficient work, for the sanitary conditions are second to none in our state and are a credit to our city; and the worthy and deserving poor have not been allowed to suffer for the necessities of life, but have been both kindly and carefully looked after. The city physician has also attended to his many calls to relieve the sufferings of our unfortunate sick; and our city has been as free from contagious diseases as any in our state, which speaks words of praise for our very able Board of Health.

SCHOOLS.

I am a firm believer in the Public Schools, for education is the wealth and strength of any city or nation, as the duties of life to-day require a person to be an expert in almost any undertaking which he may be called upon to engage in, if he is to be successful. But few realize the work and attention that is necessary in this department, in order to obtain the best results possible for the pupils; for, I believe, at no time in the history of the American people has there been that pressing need of such a high grade of excellence in its graduates as at the present time. It also takes the largest expenditure of money of any department in the city. Still, our citizens will do almost anything to-day in order that their children may receive a good education, and are willing to give their support. They only ask that the schools be as efficient as possible, and that they be conducted with due economy.

WATER AND DEEP SEWER.

Two of the most important things for every city are good, pure water and a perfect drainage system for sanitary purposes, both of which we have. Water we have in abundance, and but few cities have as pure as we; and, I believe, when we get the new pipe laid it will furnish water for a population

of one hundred thousand, and it will also give us added protection in case of fire. It is proving to be able to pay its running expenses, and it will pay every dollar that it cost and over from its own income if properly handled and looked after. The deep sewer is doing its work in a satisfactory manner, so that we are quite well provided for along this line. With perhaps a little more deep and surface sewer combined at East Rochester, it seems to me that it will do the work for some time to come; and you are paying for this deep sewer very fast, as you pay \$6,500.00 each year. The first year I was your mayor you owed on sewer bonds \$123,500.00, to-day about \$65,000.00. You will complete paying the sewer bonds in 1916.

FIRE DEPARTMENT.

To speak of the Rochester Fire Department is only to say what every citizen of Rochester knows, that it has always done excellent work considering what they have had in the past to do with. This department is of great importance to our city as we often not only owe the protection of our property but our lives as well to them. We have been very fortunate in the past as regards fire losses and while we hope for a continuation of the same we must keep in mind the necessity for adequate protection, for we cannot tell what moment we may be called upon to cope with a serious fire. A great improvement has been made in this department in the last few years, but like all other things in order to get the best results from the improvements already made it is necessary that a few more be added at once and I will try to name some of them. I think the public in general will agree with me when they understand the situation.

First, you have a chemical with the quick-hitch harness system to go with it, but no horses to hitch. Now a chemical is all right if it can be got to the fire while it is confined within the building, and will take care of quite a fire, also save property from damage by reason of water. There also wants to be a set of runners made, so as to slip the chemical on to when

there is snow on the ground. A roll-way wants to be made in the engine house, for it to run on, for with the depth of snow on the ground while I am writing this, it would take four horses to draw it any distance to a fire, and ordinarily they would not get there in time for the chemical to be of much use for that building. I have seen the snow many times much deeper than it is to-day. They also need a thousand feet of hose this year, and Torrent Hose Company needs very badly a new hose reel. When these things are accomplished, the fire department will be in good shape for some time to come; for after the new water main is laid, we ought to be able to have eight or ten streams of water on to a fire at once, anywhere in the vicinity of the square, also it will increase the force all over the city.

This new water pipe, when laid, will cost about \$65,000.00, and the Water Department has on hand to-day in notes and bonds about \$47,000.00 toward paying for this. The net earnings for 1907, barring accidents, should add at least \$6,000.00, which will make \$53,000.00; so there will be but a small sum to be hired to complete this system.

Now I recommend that a pair of horses be left in the stable for the use of the Fire Department at all times and nothing else. I also recommend that the city buy as soon as possible another pair of horses, for the road department; certainly they need three pair of horses to do their work, and have to hire some beside; and it is hard to hire always when you want them, and the city will save money by so doing. There is plenty of work to be done; and, in a heavy fall of snow, it takes two horses on each snow plough, and even with six horses for this department you could only have three snow ploughs to break sidewalks instead of six ploughs in a light snow that one horse could draw. The public want the sidewalks broken out as soon as possible. Now three ploughs, with two horses for each, can not break the sidewalks in this city in less than a day at best, and it will take a good part of two days to clear them in fair shape. If you should think best to adopt these recommendations, you could then rest one pair of your horses

alternately, that is every fourth day one pair would stand in the stable, which would help to keep your city teams all looking better, as we work our city horses very hard. There are few private individuals that work their teams more hours for the year than this city.

There are three departments at least that will have to have a much larger appropriation this year in order to be run in a creditable and satisfactory way to the city: namely, Fire, Public Library and Schools. Taking into consideration the loss of some \$5,000 00 of license money that you have been receiving, it will mean some £7,000.00 or \$8,000.00 in cash more to be raised this year, which is quite a problem. Some will tell you one way and some another, and I can see how arguments for and against some of these might be held for a day or more. Now by reason of his office, the mayor is chairman of the finance committee, and for that reason he is the one who will be blamed the most. If it were not for shirking work that becomes my duty to do, I would like to be excused from acting on this committee this year. But let me say, that whatever I recommend as chairman of that committee or any other, if adopted by the rest of the committee, that I shall be ready at all times to take the blame, and stand ready to vindicate them.

There are other departments which I have said nothing about: namely, Street Lights, Sidewalks, Surface Sewer, Parks and Commons, all of which will receive all the attention that our means will admit of as they come up for action later. There are a great many things that I might go on and explain, about the several departments and their workings, that would take me a whole day or more, which I think but a very small per cent. of our tax-payers know or even think about; for a great many things pertaining to a city have to be planned and executed, that reach far into the future, as well as for the present.

CONCLUSION.

Gentlemen of the City Council: — It becomes to-day your

important duty to elect men to the several offices, who are to receive salaries to help carry along the work of the several departments, such as city marshal, assistant marshal, fire engineers, road commissioner, superintendent of water and sewer, city clerk, city solicitor, city treasurer and tax collector. I realize it is no easy task, but allow me to urge upon you not to allow friendship or party affiliation to influence you for these positions, only considering the satisfactory qualifications of the man for the position which he is to hold. I think the success of the executive work of a city depends in a very great measure upon the harmony and personal interest of its council members and the mayor, who should work in unison together for that which would seem to benefit the largest number of tax-payers. I deem it advisable that you allow each and every petition or resolution that comes before you to be referred to its proper committee, unless it is absolutely necessary that action be taken at once, so that when you act you can do so intelligently; for, I believe, no action should be taken by the city council without thorough investigation of all matters that come before them for their consideration. I rely upon you to assist in making the year's work as pleasant and harmonious as possible, and hope for cordial cooperation of the committees of the several departments. Thus, by a united effort, we may be able to do better work and bring credit to our beloved city, and to ourselves also. And now I promise you, gentlemen of the city council, my hearty support and cooperation in any effort that is made to better the condition of our people, so far as I am able to, for I wish to pursue a policy as liberal in all directions as will be consistent with our financial situation. Now, gentlemen, I hope you will pardon me for taking so much of your valuable time, and wish to thank you for your kind indulgence.

CITY GOVERNMENT

As Organized Jan. 2, 1907.

Mayor, WILLIAM G. BRADLEY.

Councilmen.

<i>Ward One</i>	{ JOEL W. McCRILLIS, JOSEPH O. HAYES, WILLIAM R. GERRISH.
<i>Ward Two</i>	{ CHARLES E. VALLELY, HARTLEY L. WORMHOOD, GEORGE P. FURBUSH.
<i>Ward Three</i>	{ STEPHEN C. MEADER, A. ROSCOE TUTTLE, WILLIAM A. OSBORNE.
<i>Ward Four</i>	{ FRANK H. BOSTON, ISADORE P. MARCOTTE. ALBERT CARON.
<i>Ward Five</i>	{ FRANK B. MAGUIRE, CHARLES C. TORR, FRANK H. BARR.
<i>Ward Six</i>	{ ALEXANDER H. DURGIN, FRANK A. HUSSEY, GUY E. CHESLEY.

<i>City Clerk</i>	H. L. WORCESTER
<i>City Treasurer</i>	JOHN L. COPP
<i>City Solicitor</i>	SAMUEL D. FELKER
<i>Collector of Taxes</i>	JAMES B. STEVENS
<i>Street Commissioner</i>	GEORGE T. McDUFFEE
<i>Supt. Water Works and Sewers</i>	LEON E. SCRUTON

<i>Chief Engineer Fire Department</i>	HORACE C. HANSON
<i>1st. Asst.</i> “ “	CHARLES E. RANDALL
<i>2nd Asst.</i> “ “	LESLIE M. SEAVEY
<i>3rd Asst.</i> “ “	ELMER E. LOWD
<i>4th Asst.</i> “ “	LOUIS M. RICHARDSON
<i>Sanitary Officer</i>	SHERWOOD W. GOODWIN
<i>Overseer of the Poor</i>	FORREST L. KEAY
<i>City Physician</i>	DUDLEY L. STOKES

(The last three constitute the Board of Health.)

ASSESSORS.

Nahum F. Yeaton, John Young, Everett M. Sinclair.

PLUMBERS' EXAMINING BOARD.

Albert P. Covey, Dudley L. Stokes, Sherwood W. Goodwin.

TRUSTEES OF PUBLIC LIBRARY.

Mayor W. G. Bradley, Sidney B. Hayes, Stephen C. Meader, Fred P. Meader, John Young, H. L. Worcester, Willis McDuffee.

STANDING COMMITTEES.

Finance—Mayor, Meader and Furbush.

Shade Trees, Parks and Commons—Mayor, Boston and Gerrish.

Public Instruction—Mayor, Osborne and Torr.

Claims and Accounts—Durgin, Marcotte and Wormhood.

Public Buildings—Maguire, Tuttle and McCrillis.

Roads, Bridges and Drains—Hayes, Chesley and Boston.

Water Works and Sewers—Meader, McCrillis and Hussey.

Fire Department—Maguire, Tuttle and Gerrish.

Street Lights—Vallely, Babb and Osborne.

Printing—Durgin, Caron and Torr.

Adams and Old Cemetery Fund—Caron, Chesley and Osborne.

Elections and Returns—Durgin, Vallely and Chesley.

Bills in their Second Reading and Enrolled Ordinances—Marcotte, Hayes and Hussey.

Legal Affairs—Mayor, Durgin and Wormhood.

Purchasing Committee—Mayor, Meader and Furbush.

Police—Mayor, Maguire and Babb.

Janitor City Building and Fire Station—William A. Hanscam.

Special Police—George W. Preston, Lemuel E. Goodwin, Nathan Newcomb, William O. Morrell, Joseph W. Laundry, Charles H. Tebbetts, Cyrille Vachon, Warren W. Daggett, Albert E. Rollins, Patrick Keating, Venant Perreault, Edwin F. Dame, Philias Hughes, Horace Mills, Fred S. Babb, Edward Josselyn, Samuel Corson, Joseph L. Davidson, Frank S. Edgerly, Arthur H. Bickford, Walter J. Seavey, Edward L. Tebbetts, Byron P. Nute, Joseph Roulx, Charles H. Eastman, Joseph Brocheau, Samuel E. Shapleigh, William J. Hartford, Martin J. Donohue, George H. Legro, Daniel Nixon, Ernest L. Downing, Frank W. Bumford, William A. Hanscam.

Sealer of Weights and Measures—Charles M. Bailey.

Surveyors of Wood and Lumber—Frank B. Preston, Nahum F. Woodman, Edward Elliott, Nahum Yeaton, J. Trafton Whipple, Sidney B. Hayes, Miles H. Cochrane, Frank E. Hussey, Fred S. Babb.

Weighers of Hay, Straw and Coal—Daniel F. Jenness, John G. Morrill, John W. Tibbetts, Charles W. Willand, A. Roscoe Tuttle, John Bilodeau, Frank W. Smith.

Fence Viewers—James Corson, Charles W. Dame.

Recommendation of Finance Committee for Annual Appropriation.

We, the committee on finance, having considered the amount necessary for the maintenance of the several departments for the ensuing year, recommend the following amounts be appropriated for their support :

Fire Department,	\$ 3,300 00
Salaries,	5,000 00
Highways,	9,000 00
State Roads,	3,100 00
Sidewalks,	1,000 00
Miscellaneous Department,	1,500 00
Sampson Post,	150 00
East Rochester Library and Reading Room,	200 00
Street Lights,	6,600 00
City Poor and Soldiers' Aid,	1,400 00
Library,	2,000 00
Sewer bonds,	6,500 00
Interest on sewer bonds,	2,275 00
Schools,	23,000 00
Health,	300 00
County tax,	11,572 67
Parks and Commons,	150 00
High school building,	5,000 00
	<hr/>
	\$82,047 67

IMPORTANT RESOLUTIONS AND ORDERS PASSED BY THE CITY COUNCIL.

Resolution for Printing Reports.

Resolved by the City Council of the City of Rochester:

That the clerk is hereby instructed to prepare for the press as soon as possible the matter that is to go into the reports of 1905, and that bids for printing the same be submitted to such printers as may be designated by the committee on printing, and that for distribution there be printed 1,200 copies.

Passed January 3, 1906.

Resolution for Annual Appropriation.

Resolved by the Mayor and City Council of the City of Rochester:

That for the support of the various departments for the year 1906 there be raised by taxation the sum of eighty-two thousand, forty-seven dollars and sixty-seven cents (\$82,047.67), and the assessors are hereby directed to assess that amount with such overlay as may be thought necessary, the interest on notes to be provided for by the amount coming from the state, and the amount coming to the city from the License Commissioners, for licenses issued by them, shall be credited to the police department.

Passed January 16, 1906.

Resolution to Purchase Hose.

Resolved by the Mayor and City Council of the City of Rochester :

That the purchasing committee be authorized and instructed to purchase one thousand feet of two and one-half inch hose for use of the fire department, the same to be paid for from any funds now standing to the credit of the fire department.

Passed February 6, 1906.

Resolution to Transfer Money to State Road Account.

Resolved by the Mayor and City Council of the City of Rochester :

That the city clerk be and hereby is authorized and instructed to transfer from the police department to the state road account the sum of thirty-eight dollars and seventy-five cents (\$38.75).

Passed February 6, 1906.

Resolution to Purchase a Combination Chemical Fire Engine.

Resolved by the Mayor and City Council of the City of Rochester :

That for the better protection from fire, the committee on fire department be authorized and empowered to purchase a combination chemical fire engine, not to exceed in price two thousand dollars, (\$2,000), eleven hundred, thirteen dollars and sixty-one cents (\$1,113.61) to come from an unexpended balance on the new fire station, and the balance of the sum necessary to purchase the said chemical machine shall constitute a portion of the city debt.

Passed March 6, 1906.

Resolution Appropriating Money for the Extermination of Brown Tail Moths.

*Resolved by the Mayor and City Council of the City of
Rochester :*

That the sum of seventy-five dollars (\$75) be hereby set apart from the police department, for the purpose of exterminating the brown tail moths, and so much of said sum as may be required is hereby placed at the disposal of the committee on shade trees, parks and commons, for the purpose herein expressed.

Passed February 6, 1906.

Resolution to Sell the Old Fire Engines.

WHEREAS, the old fire engines are not now, and probably never will be, used by the city for fire purposes, therefore,

Be it Resolved, that the committee on fire department be authorized and instructed to sell the same, if, in their opinion, a satisfactory price can be obtained.

Passed March 6, 1906.

Resolution to Change Name of Railroad Avenue to Portland Street.

*Resolved by the Mayor and City Council of the City of
Rochester :*

That the highway known as Railroad Avenue, running from South Main Street to Portland Street, shall hereafter be known as Portland Street, the same to run from 50-54 South Main Street to Main Street, East Rochester, and said street shall be re-numbered in accordance with this vote.

Passed April 3, 1906.

Resolution to Build New City Building.

WHEREAS, the public interests and demands of the city of Rochester require a suitable building for the transaction of its business, therefore,

Resolved by the City Council of the City of Rochester :

SECTION 1. That the sum of sixty-five thousand dollars (\$65,000) is hereby appropriated for the purpose of building a city hall on the lot now occupied as such; that said sum of sixty-five thousand dollars constitute a portion of the city debt, according to Chapter 161, Laws of 1904. SECTION 2. That the city of Rochester hire the above-named sum of sixty-five thousand dollars as a temporary loan for the purpose aforesaid. SECTION 3. That a special building committee, composed of the mayor and four councilmen, to be appointed by the mayor, (the mayor to be chairman of said committee) be a committee to procure plans and specifications for said city building, and, after due investigation, shall select a plan and present the same to the city council with their recommendation, for its approval and instruction.

Passed May 1, 1906.

Resolution to Hire Money in Anticipation of Taxes.

Resolved by the Mayor and City Council of the City of Rochester :

That the finance committee be authorized to raise on note or notes of the city a sum of money not exceeding ten thousand dollars (\$10,000), in anticipation of taxes, providing it is necessary to do so.

Passed May 1, 1906.

Resolution to Extend Water Main to Champlin Mill.

Resolved by the Mayor and City Council of the City of Rochester :

That the committee on water works and sewers be authorized and instructed to extend the water main from Wakefield Street to the W. H. Champlin mill, on east side of Boston & Maine Railroad in Rochester; and the purchasing committee is hereby authorized to purchase pipe for the same.

Passed May 1, 1906.

Resolution to Hire Money to Take up Water Notes.

Resolved by the Mayor and City Council of the City of Rochester :

That the sum of thirty-seven thousand dollars (\$37,000) be raised on note or notes of the city, to replace that to be taken up by the water works now in the hands of the city.

Passed June 5, 1906.

Resolution to Lay Water Main.

Resolved by the Mayor and City Council of the City of Rochester :

That the committee on water works and sewers be and hereby are authorized and instructed to lay a line of sixteen-inch water pipe between the city of Rochester and the reservoir, in addition to the twelve-inch one now laid.

And the purchasing committee is hereby authorized to purchase such pipe and castings as may be necessary for the same.

The whole expense of the work to be paid for with any

money belonging to the water works, and that the mayor be authorized to hire a sum not exceeding ten thousand dollars (\$10,000) on note or notes of the city, should it be necessary, to complete the work, and the same to be charged to the water department.

Passed June 5, 1906. _____

Resolution not to Include Stock of Other Parties in Exemption of W. H. Champlin Mill.

WHEREAS, the city council passed a vote upon October 3rd, 1905, exempting the planing mill, machinery, and stock in trade of William H. Champlin for a period of ten (10) years, resolved that the council by said vote did not include stock in trade of any other parties or a box factory and that the city clerk so notify Mr. Champlin that there may be no misunderstanding in the matter.

Passed June 5, 1906. _____

Resolution to Accept Plans for City Building.

Resolved by the City Council of the City of Rochester:

That the plans and specifications of Geo. G. Adams of Lawrence, presented by the committee appointed to procure the same, be accepted by the city (on condition that the building can be built at a cost not to exceed sixty five thousand dollars, (\$65,000.00) and the aforesaid committee are hereby authorized and instructed to proceed with the same, and to make and execute contracts necessary to build and complete said building, and the committee shall have full authority to make any minor change in said plans necessary for the best needs of the city.

Passed August 7, 1906.

Resolution to Transfer Money from One Department to Another.

Resolved by the City Council of the City of Rochester :

That, if found necessary, in closing the accounts for the year, to transfer from any department where there may be a surplus to any other department that may be overdrawn, the committee on finance are hereby authorized to make such transfer.

Passed November 7, 1906.

Resolution to Purchase Heating Apparatus for Fire Engine House and Hall at East Rochester.

*Resolved by the Mayor and City Council of the City of
Rochester :*

That a sum, not exceeding one hundred and fifty dollars (\$150), be raised on note or notes of the city for the purpose of establishing a heating apparatus in the fire engine house and hall at East Rochester, and the same to be expended under the direction of the committee on fire department, and that it be a part of the city debt.

Passed December 6, 1906.

REPORT OF CHIEF ENGINEER OF FIRE DEPARTMENT.

To His Honor the Mayor and City Councils: —

In rendering my report of the Rochester Fire Department ending December 31st, 1906, would state that there have been 24 bell calls; one at East Rochester; one at Hansonville; 22 in the city. The engineers have responded to seven still alarms and six brush fires.

The amount of property involved in fires is as follows: Valuation of buildings, \$33,800; insurance on same, \$14,025; loss paid, \$5,958; contents valuation of \$13,200; insurance on same, \$8,800; loss paid, \$2,916.50. There have been purchased and added to the equipment 1,000 feet of 2½ inch rubber lined double jacket hose, one combination chemical hook and ladder truck. The electric fire-alarm battery has been moved and placed in the new central fire station. There has been a new granolithic bottom put into the basement of the central fire station, also one of the rooms has been furnished comfortable for a man to sleep there. I would recommend a permanently employed driver with a pair of horses at the central fire station for day and night duty for quick attendance at fires within the city, also 1,000 feet 2½ inch rubber lined double jacket hose, also four new fire alarm boxes which are greatly needed.

The cost of the fire department for the year will be found in the report of the committee on finance.

In behalf of the board of engineers I will take this opportunity to extend our sincere thanks to all the members of the

fire department, for the promptness with which they have discharged their duties during the past year. We would also thank the members of the city government, who have rendered the department any assistance during the year.

Respectfully submitted,

H. C. HANSON,

Chief Rochester Fire Department.

December 31, 1906.

Location of Fire Alarm Boxes.

No.

- 16 North Main street, corner Bridge street.
- 17 Main street, corner Congress street.
- 21 River street, corner Lafayette street.

- 34 Summer street, near Mrs. Roberts' stone house.
- 35 Portland street, near Foss' store.
- 37 Silver street, near electric light station.
- 41 South Main street, near Wallaces' shop.
- 43 Upham street, near schoolhouse.
- 47 Car barn, foot of Charles street.
- 52 Charles street, corner May street.
- 54 Charles street, corner Woodman street.

Instructions to Citizens.

1. Upon the discovery of a fire, notice should be immediately communicated to the nearest alarm box, the keys to which are in the hands of all regular police, and in boxes near each alarm box.

2. Upon the discovery of a fire, or positive information of a fire, break the glass in the key box, unlock the box, pull down the hook once as far as it will go (without jerking), and then let go. Shut the door, but do not try to remove the key, as it is locked in a trap lock and can only be removed by a release key, which is carried by each engineer, who will, as soon as convenient, release and return it.

3. All persons giving fire alarms are requested to remain by the box a moment, and if no clicking is heard in the box, pull again; and if you still hear no clicking go to the nearest box, procure a key, and give an alarm from that.

4. **Never pull an alarm for a fire seen at a distance.**

Never touch a box except to give an alarm of fire.

Give an alarm for no cause other than actual fire.

Don't give an alarm for a chimney fire.

5. Owners and occupants of buildings are requested to inform themselves of the location of alarm boxes near their property. Be sure the alarm is promptly and properly given.

Signals.

Two strokes of the bell is the all out signal.

Six strokes of the bell is for a brush fire, or a fire at a distance, where the fire department will be needed.

One stroke of the bell is the engineer's test.

The above signals are given only by the chief engineer.

Inventory of Property.

Two hose reels, two hose wagons, one hook and ladder truck, one combination chemical hook and ladder truck, three sleds for hose company, rubber coats and hats for each company, two sets swing harnesses, four horse blankets, 5,150 feet of hose, five hydrant gates, ten play pipes, six three-gallon chemical extinguishers, 590 feet of ladders. three hand engines.

REPORT OF CITY MARSHAL.

To the Honorable Mayor and City Council:

Gentlemen:—I have the honor to submit the following report of the police department for the year ending December 31st, 1906:

ARRESTS.

Number arrests,		400
Drunks,	360	
Obstructing building,	1	
Larceny,	9	
Obstructing railroad,	1	
Assault,	5	
Pickpocket,	1	
Breaking and entering,	3	
Selling liquor without license,	3	
Selling to a minor,	1	
Begging,	2	
Street walker,	2	
Delivering cider to a minor,	1	
Indecent conduct,	4	
Brawl and tumult,	4	
Cruelty to animals,	2	
Arson,	1	
	<hr/>	400

DISPOSED OF AS FOLLOWS :

Settled,	71	
Suspended,	75	
Promised to pay,	72	
Sent to house of correction,	138	
Sent to jail,	13	
Gave bonds,	12	
Discharged,	15	
Continued,	1	
Sent to reform school,	2	
Promised to leave town,	1	
	<hr/>	400
Amount of fines and costs collected by City Marshal,	\$797 61	
Witness fees and costs paid,	132 38	
	<hr/>	\$665 23
Paid treasurer,		665 23
		<hr/>
Number of lodgers,	580	
Doors found unlocked,	20	

In addition to the cases enumerated, service for the year has included the investigation of many matters that have not been brought before the court, attending to many complaints and the devoting of much time in the effort to preserve order, to protect and enforce law in the punishment of offenders.

I am pleased to say that every officer under my command has been prompt and efficient in the discharge of his duty.

Respectfully submitted,

C. A. ALLEN,

City Marshal.

REPORT OF SUPERINTENDENT OF WATER WORKS

For the Year Ending December 31st, 1906.

*To the Committee on Water Works and City Council of the
City of Rochester :*

Gentlemen:—The fifteenth annual report of the superintendent of water works is herewith submitted.

I assumed the duties of superintendent April 1st, 1906, and found the system in good working order. Water was then taken from the reservoir, and May 21 I began to supply the city from Round Pond. Water was furnished from this source until November 17, when I changed back to the reservoir. During this time the pond was lowered three feet and ten inches. The system was thoroughly flushed out in the spring and fall, and in many places during the summer, where complaints were made of the water tasting bad. These complaints were mostly from water takers on dead ends or large mains where the circulation was small. Six-inch pipe was laid through Glenwood Street to W. H. Champlin's mill, and one hydrant put in. The bushes and trees have been cut round the reservoir, and on the pipe-line between the reservoir and Round Pond, and from the reservoir to the city. Surveys have been made for the new sixteen-inch main from the reservoir to the city, and the contract for the pipe made with Charles Miller & Son of Utica, N. Y. The pipe is to be delivered here and put on the ground this winter, so that the work of laying can begin in the spring of 1907, as soon as the season will permit of such work being done to advantage. After the new main is

completed, the city will be amply supplied with water, both for domestic and fire purposes. With the two lines available, 2,000 gallons per minute can be delivered in the central part of the city for fire purposes, and the pressure maintained at fifty pounds per square inch at the hydrant.

The water takers and citizens in general can augment this considerably and add to the efficiency of the fire service by refraining from the use of water, except in cases when necessary, and waste, in time of fires. Especially is this true in the summer season, when a large number of garden hose are constantly in use for sprinkling. This precaution may seem unnecessary after the new main is completed, and would be if there was more pressure on the mains in the city. The maximum pressure is only sixty pounds per square inch, which is about the lowest limit for efficient fire service, and the nearer this pressure is maintained so much the better in case of need.

Following is the amount of pipe laid, gates and fire hydrants set, new services laid, etc. :

Hydrants replaced by new ones,	2

1 horse.

REPORT OF SUPERINTENDENT OF SEWERS

For Year Ending December 31, 1906.

*To the Committee on Sewers and City Council of the City of
Rochester :*

Gentlemen:—The annual report of the superintendent of sewers is herewith submitted :

Number of connections put in during the year,	33
Number connections to date,	898
Feet main pipe laid during the year :	
6-inch, Logan Street,	54
Total feet main pipe to date,	86,912

The sewers have been thoroughly flushed and cleaned twice during the year and are in good working order. Thirteen connections were made in East Rochester and many more applications would have been made for connection to the mains if the system was completed in that part of the city. Many of the streets in which the mains are not laid are thickly settled and the construction of sewers in these streets are very essential to the health of the community. There is no sewer in Portland street from Hobart avenue east, which is thickly settled, for about 1,000 feet and the necessity for this section to be sewered is increasing every year. The end of the present main in Portland street is not low enough and too small to drain this section and a new main would have to be laid. I should recommend starting at Silver and Winter streets and extending the sewer through Winter street to Prospect street, thence

northerly through Prospect to Portland street at which point the sewer would be three feet lower than the end of the present sewer in Portland street. This would be ample for that whole section.

Respectfully submitted,

L. E. SCRUTON, Superintendent.

Inventory of Stock and Materials on Hand December 31st, 1906.

- 1 1-inch nozzle.

REPORT OF SUPERINTENDENT OF STREETS.

To the Honorable Mayor and Council of the City of Rochester :

Gentlemen :—I have the honor to submit herewith the report of the highway department for the year ending Dec. 31, 1906.

It is a well known fact, that the permanent improvements this year have been made by building one mile of state highway, and recoating the entire concrete around Central square.

During the past year much has been expended to repair the streets about the city, which are continually getting out of repair. Much grading has been done throughout the city on sidewalks, many of the highways have been repaired with the road machine, and some have been entirely rebuilt, in various outside districts. It is most important to adopt some plan whereby a certain portion of our streets shall be macadamized each year, and that the council shall determine what sum shall be appropriated for this purpose. This is the most intelligent way to solve the great problem of producing uniformly good roads, and although no new idea, it should be a subject of careful consideration at this time.

The following is a report more in detail, of the work done the past year, viz. :

Replanked the bridge at Gonic.

Replanked the Isinglass bridge, so called.

Replanked one-half of bridge at North Rochester.

Built a new top on the two bridges at Pickering's crossing, and painted the new railing of same.

Replanked several small bridges.

Number of days' service with road machine in road building about the city and outskirts, 30.

SIDEWALKS.

240 feet of brick sidewalk with edging on River street.

540 feet of brick sidewalk with edging on Pine street.

175 feet of brick and artificial stone with edging on North Main street.

In grading sidewalks, we used cinders on the following streets:

3,000 feet on South Main street.

1,000 " Upham "

900 " May "

300 " Hancock "

1,500 " Charles "

600 " Logan "

1,000 " Summer "

700 " Chestnut "

1,000 " at East Rochester.

Property of Highway Department.

1 stone crusher.	1 boiler and engine.
1 steam road roller.	6 horses.
3 sets two-horse sleds.	1 set one-horse sleds.
3 sets double harness.	5 single harness.
2 two-horse dump carts.	1 stone barge.
1 pair wheels.	5 picks.
6 small shovels.	6 coal shovels.
3 plows (old).	6 chains.
6 post-hole spoons.	6 crowbars.
2 cross-cut saws.	3 sets fall blocks and rope.
1 hand roller.	7 lanterns (with red globes).
1 jack screw.	12 hand drills.
3 striking hammers.	3 sledges.
2 monkey wrenches.	10 snow ploughs.
2 road machines.	6 hoes.

3 turf diggers.	1 brush axe.
2 long-handled shovels.	3 grub hoes.
2 steel rakes.	2 pitchforks.
3 brush scythes and snathes.	6 stable blankets.
4 street blankets.	3 curry combs.
3 horse brushes.	3 mane brushes.
1 wagon jack.	2 axes (old).
1 hand saw.	2 spread chains.

Respectfully submitted,

GEO. T. McDUFFEE,

Superintendent of Streets.

REPORT OF TREE WARDEN.

To the Honorable Mayor and City Council:

I herewith submit my report for the year ending Dec. 31, 1906. I have set out trees in the following streets, parks and school house lots:

Meaderboro school yard, two ashleaf, two silverleaf and two Norway maples,	6
School street, nine elms,	9
Allen school yard, three elms, one maple,	4
Franklin street, one ashleaf, one silverleaf, one Norway maple, one elm,	4
Main street, five elms, six maples,	11
Common, two ashleaf, one silverleaf, one Norway maple, thirty-two elms,	36
Charles street at Unity church, one silverleaf maple,	1
Fire station, shrubs, twelve Japan quince, twelve Wingnals,	24
Total,	95

I have pruned some and have tried to keep the brown tail moth out of the trees.

SHERWOOD W. GOODWIN,

Tree Warden.

REPORT OF BOARD OF HEALTH.

To the Mayor and City Council of Rochester, N. H. :

We herewith submit to you our report for the year ending Dec. 31, 1906.

Contagious diseases reported :

- 1 six-foot office table.
- 1 key safe.

JAMES B. STEVENS,

Tax Collector.

CITY SOLICITOR'S REPORT.

To the Mayor and Council of the City of Rochester :

Gentlemen :—There are three appeals from the widening on Railroad Avenue. These claims were made under a misapprehension of the facts, in that they supposed that the city took land from three abutting owners ; when, as a matter of fact, they did not change the old layout on the street in any particular ; and so, while they are still outstanding, there is no basis for an appeal and will be dismissed. There are no other cases of a civil nature pending in court, either for or against the city.

There have been two claims for damages happening on the highway presented to the council, and by them referred to the committee on highways for adjustment : the claim of Edgar Ham and the claim of Samuel Hale, both residents of Rochester Neck, whose horses were injured by defective planking in bridges, which the city was bound to keep in repair, and the only question that arose was the amount of the damage, which the committee adjusted with the owners.

It will be necessary at the beginning of the year to get authority to lay the new pipe line from the land of George McClellan to the Wallaces' shop and to have the court lay out such a line.

The vote of the city on the license question will present a new phase of the liquor question and one which should be honestly met and the mandate of the people should honestly be carried out. Whether one believes in license or prohibition is not the question now. An honest effort should be made to enforce the law. Rochester having said what she wanted is entitled to have it. Just punishments should follow all violations.

So far as the services of solicitor are concerned every effort will be made to present the case fairly and with the object of strict enforcement. Every officer should receive that encouragement which comes from a healthy public sentiment and from a fact that every effort will be appreciated and will not be brought to naught by the prosecuting officers of the County.

I wish to record my appreciation of the uniform courtesy of Marshal Allen and his officers at all times.

Respectfully,

SAMUEL D. FELKER, .

City Solicitor.

Rochester, N. H., January 1, 1907.

REPORT OF TRUSTEES

OF THE

Rochester Public Library,

1906.

At a meeting of the trustees of the Rochester Public Library, December 28, 1906, it was voted that the report of the secretary, librarian and treasurer be presented to the city council as the annual report of the trustees for the year 1906.

REPORT OF LIBRARY TRUSTEES.

To the Honorable Council of the City of Rochester :

Gentlemen :—I have the honor to present, on behalf of the trustees of the Rochester Public Library, the thirteenth annual report, also the librarian's and treasurer's report.

The report of the librarian will give in detail what has been accomplished during the year. The work of the library has been crippled for the lack of funds. In June, we were compelled to curtail all expenses and stop the purchase of new books and other supplies that were needed, in order to keep within the appropriation. During the year, \$101.29 has been used for the purchase of adult books. Some complaints have been made by patrons of the library on account of the small number of volumes added during the year, but your trustees could only answer them by saying the appropriation was not sufficient to meet the demands of the library.

The city appropriated \$2,000.00 last year, and with a balance of \$878.63 from the year 1905, and \$135.00 from fines, making a total of \$3,013.63, we were able by careful and economical management to keep within the appropriation, and have a balance of \$21.17. From the experience of the past year, your trustees find that it will be impossible to meet the demands of the public and maintain the library in a manner creditable to the city for a sum less than \$3,000.00.

The trustees voted to use the interest of the Jennie Farrington Fund for the purchase of new books for the juvenile department. The number of readers reported by the librarian during the year, 4,715, testifies to the interest the children of our city take in

the reading room and library. It is gratifying to report the increase in circulation of 7,509 more books than last year, and 3,116 more patrons of the reading room.

Requests are frequently made for a supplementary catalogue. This matter has been considered by the trustees, but the appropriation would not warrant the printing of the same at this time.

The trustees would respectfully submit the following estimate for the year:

Books,	\$400 00
Periodicals,	100 00
Binding,	100 00
Printing and supplies,	100 00
Repairs and material,	100 00
Electric lights,	350 00
Coal and wood,	225 00
Librarian,	500 00
1st assistant,	350 00
2d “	180 00
Janitor,	300 00
Secretary board of trustees,	25 00
Furnishings,	100 00
Librarian at Gonic,	50 00
Supplies “	3 50
Supplementary catalogue,	250 00
	<hr/>
	\$3,133 50

The trustees wish to express their appreciation of the courteous and efficient work which the librarian and her assistants have rendered the public during the year.

JOHN YOUNG, Secretary.

To the Trustees of the Rochester Public Library:

Gentlemen:—As one cannot estimate either influence or result wholly, by figures, so with the work of the library, figures represent but a small part of what has really been accomplished.

During 1906, the growth of the library in books has been limited.

The whole number of volumes purchased from library funds,	115
From Jennie Farrington fund,	79
Added by binding magazines,	26
Added by gift,	167
Number of volumes unaccounted for from inventory of 1905,	13
Number of volumes lost,	12
Number replaced,	8
Making the entire number in library,	10,366

The reports show that 38,020 books have been given out, 7,509 more than last year. The fact that very few books have been added during the last three years more than doubles the work in the circulating department, not only in satisfying the patrons, but in repairing the wear and tear of the books.

Special attention has been paid throughout the year to the work with the children. On the first day of January, all books adapted to the younger readers were put on the shelves of their room, and an assistant placed in charge. The children make their own selection, under her direction, and by the aid of book lists and suggestions from the bulletin.

Since October 1st, 1905, 162 volumes have been purchased for the children, from the Jennie Farrington fund, making the entire number of volumes in the juvenile library about 1,500.

Number of books given out.	
Juvenile story books,	9,732
Non-fiction,	3,721
Entire number,	13,453
Number of readers in children's room,	4,715

The convenience of a reference room and separate reading rooms for children and adults has been noticeable, and the increasing use especially of the reference room very gratifying. The entire number of readers and students for the year has been 10,149.

The circulation at the agencies shows a decided decrease. At East Rochester this is probably due to the fact that they were without books during November, as the entire lot was exchanged. Their circulation for the year has been 760. Genie reports a circulation of 1,432, 562 less than last year.

The teachers have been using the library much more for their school work, 424 volumes having been given out for this purpose. The pupils of the high school depend on the library for their supplementary reading and reference work. This means an increasing demand for standard and reference books.

Beside gifts of books, the library has received this year a few gifts of a decorative nature, among them being the portraits of Hon. John P. Hale and Hon. Jacob H. Ela, also several pictures of state and national celebrities, which will be placed in the historical room. The Rochester Woman's Club has placed in the children's room two of the Audubon bird plates. These have attracted much attention, and have been very helpful, especially to the students of bird life.

The library has seemed quite a centre of attraction during the year, not only for the reader and student, but for the sight-seer as well, 745 visitors having been shown over the library since the first of February, an average of almost three every library day.

During the year, the great mass of public documents and pamphlets, which were so badly mixed in the hasty removal from the old library, have been put into shape and shelved, a complete copy of the shelf list made, shelf lists and accession books compared, discarded book list verified, the usual inventory of the entire library taken and the copy prepared for a printed supplement to the catalogue. This work, in addition

to the regular duties of the library, has made a very busy year, in spite of the fact that very few new books have been added.

During the coming year, many deficiencies among the reference and circulating books ought to be supplied. The supplement to the catalogue should be printed, and a number of additions made to furniture and conveniences. There is still almost every day a demand for the daily papers. As a large proportion of the adult readers are men, it would seem wise to add two or three at least.

In a community which does not often have an instructive lecture or a high class entertainment, with no permanent art or scientific exhibit, the duties of the library are manifold. It must not only be able to furnish recreation, but information along every line; in fact, serve as a stepping stone to higher education and broader culture.

I wish at this time to acknowledge my appreciation of the hearty co-operation of the assistants in the work of the year, also to express my thanks to the trustees for their kindness.

Respectfully submitted,

LILLIAN E. PARSHLEY,

Librarian.

I have examined the receipts and expenditures of the financial reports of the librarian, Lillian E. Parshley, and the treasurer, John L. Copp. I find the same correctly cast and properly vouched.

JOHN YOUNG,

Secretary Board of Trustees.

Rochester, N. H., Dec. 28th, 1906.

ANNUAL REPORT

OF THE

BOARD OF EDUCATION

OF THE

City of Rochester,

New Hampshire,

FOR THE

Year Ending December 31st,

1906.

At the annual meeting of the School Board of the City of Rochester, the superintendent of schools read his report for the year ending December 31, 1906. This report was accepted and adopted as the report of the school board to the city council and to the public.

W. H. SLAYTON, Secretary.

Rochester, N. H.

SCHOOL BOARD, CITY OF ROCHESTER.

Organization for 1906.

Hon. Chas. W. Bickford,	President.
William H. Slayton,	Secretary.

Ward One—Charles E. Washburne, Charles E. Quimby.

Ward Two—Henry E. Elliott, Wilder B. Neal.

Ward Three—Fred F. Seavey, E. Roscoe Evans.

Ward Four—Elihu L. Webster, Dr. Ernest Duval.

Ward Five—Dr. Edson M. Abbott, Rudolph L. Kramer.

Ward Six—Dr. John H. Neal, Theodore Wilmot.

Superintendent of Schools, Wm. H. Slayton.

Standing Committees.

Accounts—Bickford, W. B. Neal, Seavey.

Teachers and Salaries—Dr. Neal, Kramer, Bickford.

Music and Drawing—Webster, Elliott, Quimby.

Schoolhouses and Grounds—Kramer, Wilmot, Bickford.

Supplies—W. B. Neal, Elliott, Abbott.

Text-Books—Abbott, Dr. Neal, W. B. Neal.

Rules and Regulations—Washburne, Webster, Evans.

Transportation—Seavey, Washburne, Wilmot.

Ungraded Schools—W. B. Neal, Evans, Duval.

Truancy—Seavey, Abbott, Quimby.

Superintendent of Schools—William H. Slayton. Office in high school building. Office hours: 8-9 A. M.; 4-5 P. M., school days except Wednesdays. Telephone 136-4.

SCHOOL BOARD, CITY OF ROCHESTER.

Organization for 1907.

Hon. William G. Bradley,	President.
William H. Slayton,	Secretary.

Ward One—Charles E. Quimby, Dr. John H. Bates.

Ward Two—Wilder B. Neal, Ernest E. Berry.

Ward Three—E. Roscoe Evans, Granville Grant.

Ward Four—Dr. Ernest Duval, Albert Nelson.

Ward Five—Rudolph Kramer, John Hanscam.

Ward Six—Theodore Wilmot, Dr. John H. Neal.

Superintendent of Schools, William H. Slayton.

Standing Committees.

Accounts—Bradley, W. B. Neal, Hanscam.

Teachers and Salaries—Dr. Neal, Kramer, Hanscam.

Music and Drawing—Quimby, Nelson, Berry.

Schoolhouses and Grounds—Kramer, Wilmot, Bradley.

Supplies—W. B. Neal, Hanscam, Bradley.

Rules and Regulations—Evans, Dr. Neal, Bates.

Transportation—Wilmot, Berry, Grant.

Ungraded Schools—W. B. Neal, Evans, Duval.

Truancy—Quimby, Duval, Grant.

Superintendent of Schools—William H. Slayton. Office in high school building. Office hours: 8-9 A. M., Monday, Tuesday, Thursday, Friday; 4-5 P. M., Monday, Wednesday, Friday. Telephone: 136-4: residence: 122-2.

REPORT OF THE SUPERINTENDENT OF SCHOOLS.

To the School Board of the City of Rochester :

GENTLEMEN:—I have the honor of submitting to you my second annual report concerning the progress of the schools under your administration.

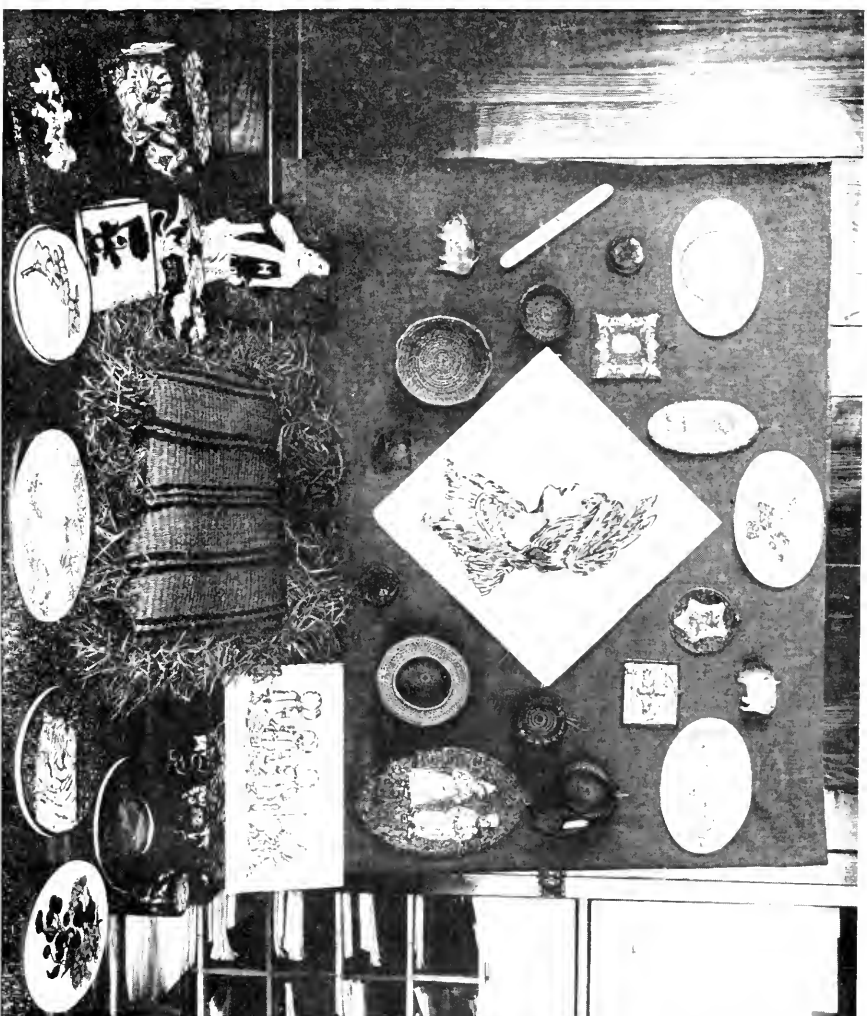

I use the word progress because the general public interest and your own activity in the administration of affairs have made conditions of progress possible. With such influences at work the schools can hold but one place in the public estimation—"the first business" of the city.

Among our immediate needs are larger appropriations, more school accommodations, manual training and that which lies within the power of the individual alone, a stronger home influence. The appropriations of the past two years have been insufficient to meet the demands of normal growth. Five of our school-rooms have fifty or more pupils in attendance. I venture the statement that the increase of a school to over thirty-five members is generally attended by a corresponding decrease of efficiency. I speak of manual training here because the nature of the community and of a large class of children seem to demand that kind of education. From the last school census report I submit the following interesting tabulation regarding the parents of school children :

Doctors, lawyers and ministers,	13
Merchants and clerks,	39
Carpenters, masons and other mechanics,	69
Shoe shop, brick yard, mills, etc.,	286
Farmers,	53
Railroad employees,	62

It is perfectly evident that if these children are to engage in manual labor in anything like the above proportion, they will give far more efficient service if part of their training is along industrial lines. This, however, is of less importance than that prime aim of manual training — the development of mental power by *doing*. There are, in our schools, at least twenty children who are sub-normal. A much larger number find it difficult to learn from books or even oral instruction. Every child has that within his make-up which calls for manual expression. Within the pages of this report you will find a photograph which illustrates some of the work along this line, which has been attempted this year. But this represents the work in its most elementary form. A room fitted up with twenty Sloyd benches, with the regular equipment, would furnish ample provision for all the boys in the high school and the three upper grades. The cost of instruction would be an added expense, but unquestionably more than repaid by the increased efficiency that would be attained in mathematics, language and other subjects that correlate with manual labor.

Finally, there is great need of a more positive home influence. I wish the parents might confer oftener with the teachers, learn more of the work that is being done in school and try to direct the activities of the children along such lines as would supplement rather than obstruct the work. I do not mean to say that the home by any means opposes the work of the school, but it is true that, unless the activity of the child is directed along useful lines at home, there is a tendency to break the habits of regularity of effort which are insisted on at school. Many of the parents lack that professional knowledge of the child's mind which is a part of our teachers' training. Our teachers, on the other hand, lack that practical knowledge of the child mind which is the inborn trait of the parent. Our work will never reach its best results until there has been a constant and thorough interchange between these two educational factors.

ROCHESTER GRAMMAR SCHOOL, GRADE 8, MISS ROLLINS, TEACHER.

The Work.

The results of the instructional work depend upon three external factors: the program of studies, its interpretation and its application. During the present year we have followed as far as possible the Program of Studies for the Common Schools of New Hampshire, issued under the direction of the state department of public instruction. The daily schedules have been based upon Schedule III of that program, which refers to graded schools. The interpretation of the program has been taken up in teachers' meetings, each grade assembling monthly. It has been impossible to discuss all the subjects in detail, hence our efforts have been concentrated upon two subjects, geography and arithmetic. Briefly, the plan is as follows: Each teacher makes out for the next four weeks a prospective outline based upon the state program, and suited to the ability of her class; these outlines are submitted to the superintendent, and finally the teachers meet to discuss them and formulate from them a detailed course of study which specifies the work to be covered each month. Next year this outline will be put in form for practical use, and our efforts will be turned toward other subjects. Thus far twelve grade meetings have been held, and I am sure greater efficiency and unity in the work have been secured. The application of the program of studies devolves upon the individual teacher. I am confident this part of the work has been done wisely and efficiently.

In connection with geography and the study of industries some of the teachers have taken their children after school to visit the mills and the brickyards. Charts illustrating the various industries have been made by mounting upon heavy cardboard the crude products as corn, wheat, cotton and so forth and the articles manufactured therefrom. Another feature of the geography work is the "books" made by the children. These consist of maps, charts, and illustrated compositions that serve to show the scope of the work.

In arithmetic our strife has been for the common-place but

fundamental virtue of exactness. We still believe, wild rumors to the contrary notwithstanding, in the tables; that a nine-year-old child should know, among other facts, that nine sevens are sixty-three and that nine square feet equal one square yard. Consequently, after these facts have been rationally developed, the excellent feature of drill is introduced and practical measurements with the standard units.

Last spring, as a result of the investigation of several systems of penmanship, your board voted to introduce the Whitehouse Natural Movement Method to supplant the vertical system then in use. The work is not yet satisfactory but general improvement is noticeable and some classes have done especially well. I hope the time will come when we can have special supervision in this subject as the great majority of teachers have little knowledge of the technique of writing. In many towns the drawing supervisor takes charge of this work. In several Massachusetts cities the instructors in commercial branches in the high schools supervise the work in the graded schools. The excellent results secured by our drawing and music supervisors are sufficient proof of the value of special supervision, and I am sure that similar results could be attained in penmanship.

School Exhibitions. During the spring term two notably successful exhibitions were held. The first of these was the Horace K. Turner Art exhibit. A net amount of about \$90 was secured from the sale of tickets by the children and twenty framed pictures were purchased for the adornment of the school rooms. Immediately following this was the exhibition of representative work done in the schools during the past year. A large number of parents and citizens testified as to the excellence of the work in all subjects on exhibition.

Arbor Day was observed at Gonic and Meaderboro by the children breaking ground for their first school-gardens. The results at Gonic were not all that could be desired, but the Meaderboro children had better success. The latter school one day last fall supplied the superintendent's table with a bountiful

vegetable dinner. Under the auspices of the civic improvement committee of the Woman's Club, Arbor Day was very fittingly observed at School Street by the planting of a row of thrifty trees. Exercises were first given by the children of the school.

During the winter term the members of the Woman's Christian Temperance Union met at the East Rochester school, and after an address by the president and exercises by the children, presented a framed picture of Frances Willard to the school. Following the exercises, an informal parents' meeting was held, the superintendent speaking briefly of the work in the schools and the relation of the home to the school. I wish to commend the interest that was shown in the discussion that ensued.

The children of the Rochester eighth grade were given a historical treat in the spring term by Col. Horace L. Worcester who explained in detail, from a large picture, the naval engagement in Mobile Bay.

Memorial Day was made real to every boy and girl in the city by Department Commander O. B. Warren who presented each one with a small American flag.

Let me say that all of these seemingly incidental expressions of thoughtfulness on the part of individual or organization have not been without their permanent effect.

High School.

The growth of the school from 158 to 179 in a single year speaks well for the general management and the teaching force of the school. Every attempt is being made for the three-fold development of the students. I believe the great problem of subordinating the athletic interests to the more serious work of the school is being competently and effectively managed. The class rooms show an air of industry. In addition to the good moral influence which the atmosphere of the school gives, the daily chapel exercise fills a most important part in bettering the lives of the students. This is not a formal, perfunctory service but is carefully planned by the principal. I wish to commend most heartily any effort which shall impress upon the minds of our young people, who are being reared in an intensely active age, the need of a close relation to those things which are unseen but "out of which are the issues of life."

The requirements of the state department have made necessary the purchase of an unusual amount of books and apparatus but our equipment is now complete and up to date.

The one-session plan will eventually prove its superiority over the two-session day. Naturally a little time is required in order that the hours of the home and of the school become adjusted to one another.

For a detailed consideration of the work in this department, I would refer you to the report of the principal.

Teachers.

Fewer changes have taken place in our teaching force this year than any previous year. At the beginning of the fall term only seven new teachers entered the service of the city, and but four of these succeeded teachers who went elsewhere for higher salaries. This is one of the most promising signs in the work, and is unquestionably due to the graded schedule of salaries which was adopted by the board in 1905. Under

this schedule more than half of the teachers were re-elected last June at salaries varying from \$400 to \$425. Our average salary now for the grades is about \$405 per annum. Yet, in spite of this increase, the aggregate salary item is little more than that of last year. In its recommendations for re-election, the committee on teachers and salaries recognized as eligible for increase only those who were fully satisfactory. Thus the increased compensation is actually based upon professional development and merit rather than tenure of office alone.

It is a fact worthy of comment that in the past two years alone some of our teachers have been elected to positions in Cambridge, Brockton, Newton, Salem (Normal), Chicopee and Revere, Mass.; Manchester, Nashua and Concord, New Hampshire; and Washington, D. C. This fact bears witness of their excellence. But others, equally efficient, though sometimes lacking in experience, have taken their places and thus the chief loss has been in the time required for the new teacher to become acquainted with her duties.

The work of our teachers is marked by untiring energy and a whole-souled enthusiasm based on the foundation of excellent training. It is gratifying to note the deep personal interest that the teachers have in their pupils. This has been manifested by their individual work with the slower pupils and by their visits to the homes. The ideal teacher must be an apt student of human nature who can analyze and estimate the traits of the "real boy" and the "real girl."

School-houses and Grounds.

The conditions enumerated in my last report are practically unchanged so far as increase of room is concerned. Each year a small sum is expended for repairs where repairs are most needed. This year the lot fell to the old high school building. The space in the south-eastern part of the building has been made over into two rooms, the corner room being fitted with adjustable desks and accommodating forty pupils. The

"dark room" has been painted a very light cream tint. The room in the south-western corner of the building has been enlarged by taking out a partition which formerly divided it from a cloak-room. Thus every square foot of room in this building has been made available for school purposes.

At the high school building, in defiance of nature's law of impenetrability, fifty-three children again occupy the space intended for forty-nine. The increased attendance in the high school makes it a question of only two or three years before one of these grade rooms must be given up to accommodate that larger number.

I am convinced that we do not get the largest measure of usefulness from a school plant until the surroundings have been beautified and the interiors made attractive. Many of Rochester's visitors come from Dover on the electric cars. Hence the Gonic school-house with its barren grounds gives them their first and probably lasting impression of Rochester's school exteriors. One hundred dollars would grade and seed a lawn around this building as attractive as the one on the high school lot. Another hundred dollars could be used very profitably on inside finish.

The care of the buildings this year has been, on the whole, very satisfactory. The use of saw-dust saturated with kerosene for sweeping has proved an economical and practicable means of laying the dust. Once more I would call your attention to the untidy appearance of the old high school grounds. This is due to the questionable policy of "making land" about a school building, whose grounds are already more than ample, by the toleration of a public nuisance which would be considered in most communities a violation of the laws of decency and good health.

Attendance.

The registration for September, 1906, was 1,146, which is an increase of 48 over last year. The percentage of attendance in all the schools for the months of September, October and November, 1905, was 93.9; in 1906, 94.6. The number of tardinesses for the same months in 1905 was 598; in 1906 the number was 436. This refers only to the grades. In the high school there has been an increase in tardiness over last year, owing, in part, to the one-session plan. This condition can be remedied by an adjustment of the home hours to correspond to the school hours. Comparatively few of these students, will, in later life, find a vocation that will allow of such easy-going habits. Following is a list of pupils neither absent nor tardy during 1905-1906:

High School — Jerome Altheimer, '08; Alfred Beers, '08; Perley Roberts, '08; Edgar Varney, '09; Vivian Humphrey, '09; Angie Roberts, '09; Ruth Tebbetts, '09; George Chase, '09.

Grammar School — Archey Canney, Horace Davis, Albert Lunt, Albert Rollins, Alpheus English, Leon Ware, Bertha Allen, Rexford Bumford, Carlyle Sweet, Mildred Boyle, Gladys York.

Old High School — Beatrice Page, Nina Page, Raymond Libby, Maud Reid, Mabel Beandoin, Eben Wallace, Annie Lowe.

Goic School — Helen Watson, Blanche Caya.

East Rochester School — Archie Furbush, Raymond Jones, Elizabeth Garnett, Blanche Kimball, Annie Garnett, Catherine Clark, Willis Hayes, Ida Jacobs, Elliot Washburn, Ada Jacobs, Gladys White, John Hickey.

Maple Street School — Oscar Tremaine.

School Street School — Stacy Hammond.

Meaderboro School — Laura Dennett, Louise Dennett.

Grammar School Graduation.

The custom of presenting the grammar school graduates with diplomas has been in vogue for several years. Last June all the graduates met in the high school assembly hall, holding their exercises together. Principal Robertson gave the class a "heart to heart talk" which was replete with good advice as to their next year's work. Following is the order of exercises and list of graduates:

Rochester Grammar School, Annie I. Rollins, teacher — Ruth Bennett, Beatrice Davis, Maud Nickless, Blanche Hartford, Mildred Wescott, Sara Greenfield, Marion Foss, Grace Berry, Clara Evans, Elva Pettigrew, Alice Fairbanks, Frances Graham, Lura Clifford, Alice Bean, Mildred Hersom, Edith Hersom, Ruth Evans, Junia Irish, Hazel Roberts, Hazel Hussey, Vivian Dame, John Lary, Llewellyn Fernald, Roland Sanborn, Philip May, Verne Ramsdell, William Piercy, Albert Rollins, Eugene Therrien, Horace Davis, Forrest Davis, Irving Braudis, Burnham Annis, Victor Lamy, William Prew.

East Rochester Grammar School, Florence A. Morrison, teacher—Lena Clark, Margaret Davidson, Helen Draper, Elizabeth Garnett, Blanche Kimball, Lena Knox, Edna Leake, Zelma Letch, Roy Abbott, Harold Bickford, Willis Blaisdell, Roy Carpenter, Archie Furbush, Harry Hayes, Raymond Jones, Andrew Ridlon.

Gonic Grammar School, Nellie A. Collins, teacher—Grace Cate, Alta Dodge, Florence Ham, Florence Keates, Edna Otis, Esther Watson, Orin Edney, Harold Foss, Walter Marison, George Newbury, Adalor Wood.

ORDER OF EXERCISES.

March.

Violin solo,

Piano accompaniment,

Welcome from high school,

Response for the class,

Address,

Presentation of diplomas,

Class song, "School Friends,"

Blanche Brock.

Marion Sanborn.

William Nixon '09.

Walter Marison, Gonic.

Principal Robertson, high school.

Mr. Fred F. Seavey.

Class of 1906.

AGNES B. GEORGE,

Died December 14, 1906.

Graduated from Plymouth Normal School June, 1906.

Principal East Rochester School September–December, 1906.

In accordance with a motion of the school board at its January meeting, a special committee appointed by the mayor drew up the following resolutions:

WHEREAS, Miss Agnes B. George, for one term principal of the East Rochester school, has been taken from us by death, therefore,

Be it resolved by the school board that they do hereby express their regret for the loss which the school and community have sustained. Though her service was brief, she left upon all whom she met the impress of noble character and a life animated by high ideals.

Be it further resolved that these resolutions be spread upon the records of the board and a copy sent to the parents of the deceased.

DR. JOHN H. NEAL,
RUDOLPH KRAMER,
ALBERT NELSON,

Committee on Resolutions.

Conclusion.

I wish it were possible in the limited space of this report to acknowledge the services of all those who have so heartily co-operated with us in the work this year. To the members of the school board who have given of their time and effort especial credit is due. The parents have been very helpful. The local press has carried reports of the work to many who might not otherwise have received them. To these in particular and to others whose services have been of such great assistance, I wish to express my thanks and appreciation.

Respectfully submitted,

W. H. SLAYTON.

January 10, 1907.

REPORT OF THE PRINCIPAL OF HIGH SCHOOL.

To the Superintendent of Schools :

We of the high school have endeavored to follow out, during the past year, the lines of action and general management stated in my last year's report to you. The degree of success with which our efforts have met, is doubtless as well known to you as to us. The successful conduct of any school requires a fixed policy on the part of the principal, and the hearty cooperation of school board, faculty, student body and friends. I have been highly gratified with the manner in which such co-operation has been given me, and at the almost uniform good will and pleasantness with which the daily work of the school has been carried on. In the matter of

Discipline,

by which is meant the general conduct of students in their relations and duties to school work, it may be said that in the *ideal* school the subject is unheard of as every one is so intent on work and the best interests of his school that there is no time for anything but strict attention to business. We have not yet attained to the ideal, but the smoothness with which the school machinery is running, would seem to indicate that the vast majority at least are endeavoring to realize the objects and purposes for which the school exists.

One Session Plan.

Originally a non-believer in the one session plan, I have watched its workings during the last term of school with much

interest. From an educational standpoint, I am led to acknowledge its vast superiority over the old plan. Its chief advantages are these :

FIRST. It utilizes the hour between 8 and 9 o'clock, when the mind is in the best condition for work.

SECOND. It does away with the after-dinner hour, always dreaded because of the unreceptive mental condition that comes immediately after a meal. It also avoids the nervous exhaustion of the late afternoon hour.

THIRD. It is therefore less exhausting on the physical and mental vitality of the pupil.

FOURTH. It gives teachers better opportunity to accomplish the vast amount of necessary out of class work that devolves upon them.

FIFTH. It gives willing students an opportunity to return in the afternoon for individual assistance.

SIXTH. It avoids all interference between athletic and other side interests and regular school work.

Its chief disadvantages are the increase in tardinesses, and the probable interference with the home dinner hour—disadvantages which must be more than offset by the advantages.

I have heard little complaint from parents, while the student body is unanimously in favor of the plan.

Courses of Study.

Owing to the ruling of the Department of Public Instruction which makes the study of American History and Civics compulsory for all candidates for graduation in approved high schools, some adjustment of the present courses may be necessary to accommodate this subject.

I have already suggested to the board the advisability of abolishing the so-called Special Course, which permitted the graduation of students who had not done work sufficient to entitle them to a regular diploma. A student not capable of doing "fifteen hours' work" satisfactorily should do what he

can and do it well even if it be not more than "five hours," and be given a diploma only after the required amount is satisfactorily completed.

Economy.

In our demands for books and supplies we are endeavoring to be as thoughtful of economy as is consistent with the best interests of progress. With the swift advance in educational subjects, text books become obsolete and unreliable in a few years. Changes, therefore, become necessary, apparently too frequently in the minds of those not in touch with the progress of the times. Changes in texts will, however, only be asked for when in our deliberate judgment, the best good of the school demands them.

Wastefulness.

One of the most discouraging facts in the school work here is the wastefulness of the students in their use of school supplies and books. In spite of constant effort to prevent it, paper is wasted and books destroyed in a manner that is almost disgraceful. Possibly a little co-operation at home might be useful in helping to impress upon students their obligation to use well books loaned them by the city. Possibly too if students were compelled to furnish their own writing material they might be more careful and appreciative.

Graduation.

With the permission of the board, we returned last year to the graduation exercises in which the parts were furnished by members of the class. The strong words of approval given the exercises by the press and citizens individually, would seem to indicate that the change was acceptable and worthy of continuance.

Attendance.

I am pleased to report an improvement in general attendance on the part of the school. There seems to be a growing conception of that personal responsibility and personal duty which is sure to produce better results in every line of school work.

I look for future co-operation on the part of parents so that nothing but sickness or other necessity shall keep students from their classes, and when the meaningless "Please excuse ——— for absence yesterday" shall give place to a simple statement of why the student was absent, a form which many are already using. The interested, successful student endeavors to put school duties first, and thoughtful parents help their children in such endeavor.

Outside Interests.

I have endeavored to help along the athletic, social and other outside interests of the school, believing that such things aid in the general development of the school, giving vent to youthful energies which must find some form of expression. My constant aim is to make these things develop the manly side of student life, to teach honesty and to develop the proper theory of sport for sport's sake, a side of inter-school athletics which seems to be sadly lacking in most high schools and the cultivation of which must greatly aid our young men in their future lives.

The Alumni.

To the Alumni the thanks of the school are due for the quick response given to my suggestion that they offer prizes for elocution.

That the result was highly satisfactory can be doubted by no one who attended the contest for the prizes and noted the excellent manner in which the contestants did their parts.

Alumni co-operation is always helpful, and I look for its continuance and enlargement in ways obvious on all sides.

It is gratifying to note in this connection the revival by the class '06 of the excellent custom of leaving some memorial of itself for the good of the school. They have donated three pictures: "The Creation," "The Aurora," and "Dante and Beatrice," to be hung in the assembly hall—the whole valued at \$50.

Individual alumni and friends of the school desirous of doing it a kindness, might give reference books to the library, pictures or casts to the rooms, or money or medal prizes for excellence in general or particular lines of scholarship. It seems strange that when almost every good high school and fitting school in New England, has many and varied incentives in the way of prizes for excellence in endeavor, Rochester high has not one.

In Conclusion.

I wish to express my thanks to you and through you to the school board for the cordial support which has been granted me. If the high school is not doing the work it should, the fault can not be layed to the door of superintendent and school board who have certainly done what they could for the school's best good.

S. W. ROBERTSON,

Principal.

High School Graduation.

PROGRAM.

Music.

- 1 Salutory with Essay, "Objects and Obstacles in Life"
Grace May Dunlap.

- 2 Historical Essay, "William the Silent"
Hazel Drew Berry.

- 3 Class Essay, "*Facta non Verba*"
Florence Edna Dame.

Music.

- 4 Science Essay. "Radium"
Floss Chase Plummer.

- 5 Oration, "Shylock, a Character Study"
Everett A. Roberts.

- 6 Essay, "Advantages of Life in New England"
Jennie May Foss.

Music.

- 7 Essay, "The Almighty Dollar"
Maude Moore Wilmot.

- 8 Honorary Essay, "*Cives Americanus Sum*"
Nora Katherine Collins.

- 9 Valedictory Addresses,
S. Elsie Hayes.

Presentation of Diplomas.

Singing, Class Ode.

Note.—Nos. 9, 1, 8 and 3 were appointed for scholarship in that order; the others by competition.

CLASS ROLL

CLASSICAL COURSE

Nora Katherine Collins,	S. Elsie Hayes,
Grace May Dunlap,	N. Catholyn Vickery.

CLASS ODE.

Words by S. Elsie Hayes.

Music by Florence E. Dame.

We have come to the first of our partings,
We are met for the last time tonight;
Behind us, the gladness of school days,
Before us, a future of light.
We have spent these four glad years together,
We have worked with a will; we have played;
But always, whatever we've done here,
The will of our King we've obeyed.

And tonight, at the end of this training,
We stand here all armed for the fray;
We know not what foes must be conquered,
But we know that we'll sure win the day.
Some go at once to the conflict,
All ready to fight and to die,
Some go for still more preparation
Than is given in Rochester High.

But whatever our place in the ranks be,
We are sure that our hearts e'er shall hold,
Facta non verba, our motto,
Inscribed in letters of gold.
And at last, when life's struggle is over,
And the battle is fought and is won,
We will meet by the Beautiful River,
In the Land of the Setting Sun.

Report of the Supervisor of Music.

To the Superintendent of Schools:

Dear Sir:—The work in the music department is progressing satisfactorily in all the grades. The too frequent changes in the corps of grade teachers seems to be a barrier to the ideal condition, as it must be in all the departments. Our talented and ambitious young teachers, with the exception of a few who happen to have home connections in Rochester which hold them with us, as soon as they have acquired an experience sufficient to render their service more valuable, secure employment in higher salaried positions. New ones step into their places and the work of training has to begin all over again. Real progress comes to a standstill; if, indeed, we are so fortunate as not to lose ground already gained.

In a few instances we have been handicapped to some extent by the teacher not being sufficiently musical in temperament to be able to conduct the singing lessons successfully. This has been partly overcome by the teacher exchanging with one in the building during the music period. This plan, although the best thing under the circumstances, has some obvious drawbacks both for teacher and for pupils, either rarely doing as good work as if they were constantly in association.

The primary grades and some of the classes in the lower grammar grades are developing musical interest in individual exercises, which are being conducted in the form of contests. The literation of the staff has been learned in this way more satisfactorily than by any other device which we have heretofore been able to conceive of. The primary classes are much interested in some two-measure and four-measure exercises which they are allowed to sing occasionally in order that we may be able to be in touch with individual progress and attainments. We are careful not to have the pupils look upon these exercises as tests in the ordinary sense of the word, but they are encouraged to regard them in the light of recreation. The

spirit of emulation enters into the exercises, and the mind is thus rendered receptive and much is absorbed by the pupil which could not be taught him even by much faithful drill of the ordinary kind.

The interest in the high school is satisfactory. The annual concert having become a much looked for event as a matter of course does not call for any special comment in this report. The school was assisted in the rendition of "Ruth," (A. R. Gaul) by Mrs. Dora C. McDuffee, Miss Elyse Wallace and Mr. Carl B. Hutchins with the solos and Mr. Mark S. Dickey at the piano. That the above named artists performed their work creditably goes without saying. How the scholars performed their part we are willing to leave to others to judge. Suffice it to say that they worked faithfully and attentively and their teacher did not feel ashamed of them.

I believe in the principle of making music in the high school elective, provided everybody concerned with the school, especially the teachers, are in sympathy with its progress. If the teachers, and notably the principal should happen to be a man who took little, if any, interest in the music, it would probably work unfavorably. Indeed, good work in the music department cannot be maintained in any school without the sympathetic co-operation of all those concerned in its welfare.

I desire to call attention to the valuable services rendered the High School orchestra again this year in preparation for the annual concert. The young people are especially favored in having the services of so talented and experienced a musician. Mr. Manning is setting a praiseworthy example in showing his interest in the public schools by freely giving his services. That he did his work with a whole heart was manifested by the performance of the young people.

In closing this report, I wish to express to the teachers in the grades and in the high school my obligations for the sympathetic co-operation so essential to any true success. I wish also to thank the superintendent and school committee for

liberal co-operation in furnishing needed supplies, and the pupils and their parents for the many expressions of confidence and esteem for which I am indebted to them.

Respectfully submitted,

A. E. FRENCH.

Report of the Supervisor of Drawing.

To the Superintendent of Schools:

Dear Sir:—The past year has shown a gain along all lines of work where drawing was concerned and where it has been correlated with other work. It is found by progressive teachers to be a stimulus to every pupil when his work can be illustrated and made of real practical value by his own hands.

Hand work is one of the greatest avenues for awakening latent constructive ability and, under guidance, objects of beauty and usefulness can be constructed.

Anyone visiting the exhibition of last May could readily see that the children, given half a chance, were ready and interested to put their instructions to practical use. These evidences, under the conditions of limited time and material, show a promise of what may be accomplished with a greater amount of time for the manual work and *art* principles. These principles must always underlie all that is really worth while in any activity of life, for right living itself is an art.

The principles of color have, in several grades, been quite thoroughly taught, but still more practice is needed to lay a good foundation for taste and judgment.

The lower grades are actively working out their little problems with a growing understanding. We feel that the interest by *all* grades is not growing less, but shows more enthusiasm and earnestness for work each year.

Respectfully submitted,

EVA E. BUNKER.

APPENDIX.

Financial Statement for Fiscal Year, Ending Dec. 31, 1906.

RECEIPTS.

Appropriation for 1906,	\$23,000 00
Literary fund,	764 33
Dog tax,	1,185 39
Cash from tuition,	172 50

Resignations and Appointments.

Resigned.		Appointed.
WINTER TERM.		
Mae A. Osgood.	Maple St., grade I.	Bessie M. Hartshorne.
SPRING TERM.		
Elsa W. Regestein.	High School,	Martha L. Reynolds.
Ina C. Atwood,	“	Myrtle Young.
Mae W. Moore,	E. Rochester, I, II,	Alice E. Small.
Adelaide M. Coffin,	“ III, IV,	Nettie E. Leach.
Grace M. McDuffee,	Gonic, grade II,	Ina C. Pearson.
Bertha M. Evans,	Maple St., grade III.	Emily J. Bean.
FALL TERM.		
Gertrude M. Johnson.	Old High, V.	Jeanie J. Keir.
*Agnes B. George,	E. Rochester VII-VIII.	Marie DeRochemont.
*Deceased.		

Several temporary changes have taken place in the teaching force during the year: Miss Florence A. Morrison and Miss Mertie M. Huckins were granted leave of absence in April on account of ill health. In September, Miss Mary C. Emery was called home to care for her mother. She returned at the beginning of the winter term. On December 14, the last day of the fall term, Miss Agnes B. George died after a brief illness. This loss seemed almost irreparable, as Miss George had endeared herself to her school and the community by her earnest and sympathetic interest in the children.

Miss Annie L. Ball and Mrs. Fred S. Gray have, in the absence of these teachers, continued the work without loss to the schools. Their services in time of emergency have been invaluable, and I greatly appreciate their assistance.

Janitors of School Buildings, Jan. 1, 1907.

Number of school buildings in use,	7
Estimated value of school buildings, etc.,	\$140,000 00
Average cost per pupil, based on total enrolment,	\$20 17
Average cost per pupil, based on average membership,	\$22 95
Number of tardinesses,	1,835
Number of pupils not absent or tardy during the year,	45
Number of visits by the school board,	6
Number of visits by the superintendent,	556
Number of visits by parents, citizens and others,	1,552

No School Signal.

Two blasts on the fire alarm repeated once will be the signal for no school.

When sounded at 8 A. M. there will be no school in the forenoon. When sounded at 12.45 there will be no afternoon session. The signal sounded at 11.30 will prolong the morning session of primary schools one-half hour, and of grammar schools and high school one hour, at the end of which the schools will be dismissed for the day.

The same signals will be sounded at Gonic and East Rochester.

Schedule of Salaries.

First year,	\$360
Second year,	380
Third year,	400
Fourth year,	425
Fifth year,	450

This schedule applies only to teachers in the graded schools who receive the full recommendation of the committee on teachers and salaries.
